CYBERSECURITY & IT PROFESSIONAL | SOC ANALYST | PENETRATION TESTER | IT SUPPORT

PROFESSIONAL SUMMARY

- Cybersecurity and IT professional with multi-year experience spanning security analysis, authorized penetration testing, vulnerability assessment, technical troubleshooting, incident documentation, user support, and remediation guidance across network, application, system, endpoint, and mobile environments.
- Hands-on SOC investigation experience using Microsoft Sentinel, Microsoft Defender for Endpoint, KQL, Windows Event Logs, Sysmon, Microsoft 365/Azure sign-in data, endpoint/identity telemetry, process trees, Wireshark, and IOC correlation for alert triage, incident analysis, scoping, escalation, and reporting.
- Offensive-security experience with reconnaissance, enumeration, vulnerability validation, web/application testing, exploitation workflows, risk rating, remediation validation, and automation using Nmap, Nuclei, OWASP ZAP, SQLMap, Hydra, Nikto, ffuf, Python, Bash, and PowerShell.
- CompTIA Security+ certified with a Diploma in Computer Programming, Canadian operations/support experience, and a hands-on cybersecurity portfolio covering SOC investigations, penetration testing, automation, and technical projects at akachimaduako.com.

CORE SKILLS

SOC / Incident Response: Security Monitoring | Alert Triage | Incident Investigation | Incident Response | Escalation | Case Documentation | IOC Correlation | Phishing | Credential Abuse | BEC | Suspicious PowerShell

SIEM / EDR / Cloud: Microsoft Sentinel | Microsoft Defender for Endpoint | KQL | Windows Event Logs | Sysmon | Wazuh | Splunk | Microsoft 365 | Azure Sign-ins | SharePoint / Exchange Logs

Penetration Testing: Network & Web Application Testing | Vulnerability Assessment | Reconnaissance | Enumeration | Exploitation | Retesting | Remediation Validation | OWASP Top 10 | PTES | API Testing

Offensive Security Tools: Nmap | Nuclei | OWASP ZAP | SQLMap | Hydra | Nikto | ffuf | RustScan | subfinder | httpx | whatweb | katana | waybackurls

IT Support / Systems: Windows | Linux / Kali Linux | Microsoft 365 | Hardware & Software Troubleshooting | User Support | Salesforce Ticketing | Active Directory Fundamentals | Command-line Diagnostics | Wi-Fi / Ethernet Troubleshooting

Networking / Scripting: TCP/IP | DNS | Wireshark | pfSense | Snort | Suricata | Python | PowerShell | Bash | Git/GitHub | Technical Documentation | Problem Solving | Customer Service

Portfolio: akachimaduako.com | SOC: akachimaduako.com/soc/ | Penetration Testing: akachimaduako.com/pentesting/ | GitHub: github.com/BlackGuyFawkes

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst / Penetration Tester | Upgraded Era ICT & Cybersecurity Solutions | Nigeria | 2019 - 2023

- Performed security analysis, penetration testing, vulnerability assessments, and technical troubleshooting across client networks and systems to identify weaknesses, validate findings, assess risk, and recommend corrective actions.
- Managed findings from discovery through validation, documentation, risk prioritization, remediation guidance, and follow-up testing while communicating status and impact to technical and non-technical stakeholders.
- Automated vulnerability-assessment and reporting tasks with Python, Bash, and PowerShell, reducing assessment time by approximately 15% and improving consistency across testing workflows.
- Updated assessment methods to reflect emerging threats and security best practices, improving testing effectiveness by approximately 30%.

Penetration Tester | MTN Nigeria | Nigeria | 2020 - 2022

- Conducted authorized network, web/application, system, and mobile application security testing to identify exploitable vulnerabilities and support remediation planning.
- Analyzed and documented technical evidence, risk, and remediation requirements; supported validation, follow-up testing, and cross-functional problem solving.
- Developed cybersecurity training materials and helped onboard and train 10 new team members, strengthening knowledge transfer and team readiness.

CANADIAN SECURITY, OPERATIONS & SUPPORT EXPERIENCE

Condo Concierge - Night Operations | Elite Residential Concierge | Toronto, ON | 11/2025 - Present

- Manage overnight access control, resident and visitor concerns, incident response, escalation, and detailed security documentation in a high-traffic condominium environment.
- Prioritize simultaneous issues, coordinate with appropriate personnel, troubleshoot access and operational problems, and maintain accurate shift-handover records for continuity and accountability.

Security Operations Centre - Physical Security | Sentinel Security | Toronto, ON | 09/2024 - 11/2025

- Monitored security operations, documented incidents and service requests, coordinated responses, and escalated unresolved issues using established procedures.
- Used Salesforce-based ticketing and computer systems to record requests, incidents, status updates, and follow-up information while supporting guests, staff, and users with access and operational issues.

Security Guard | Vest Security | Toronto, ON | 02/2024 - 09/2024

- Performed access control, patrol, incident documentation, customer service, and escalation while maintaining accurate records and following site procedures.

SELECTED CYBERSECURITY & IT PROJECTS

SOC Analyst Portfolio - Five Investigation Cases | Personal Lab | akachimaduako.com/soc/ | 2026

- Completed five documented synthetic-lab investigations using alert triage, evidence collection, log analysis, cross-source correlation, scoping, severity classification, escalation, and containment recommendations.
- Investigated credential attacks, phishing/account compromise, encoded PowerShell/payload activity, endpoint/process behavior, and Microsoft 365/BEC scenarios using Sentinel, Defender for Endpoint, KQL, Sysmon, Windows logs, M365/Azure telemetry, and Wireshark.

Penetration Testing Portfolio / Pentest Toolkit / AutoPwn | Personal Projects | akachimaduako.com/pentesting/ | 2026

- Built and exploited progressive Easy-to-Hard lab environments covering web compromise, JWT/API authentication bypass, command injection, reverse shells, network pivoting, and database access, with documented risk ratings and remediation guidance.
- Built scoped reconnaissance and recon-to-scan automation for asset discovery, service identification, vulnerability scanning, Nuclei workflows, and Markdown reporting using Python and shell tooling.

Technical Support & Systems Labs | Personal Projects | Toronto, ON | 2025 - 2026

- Built and troubleshooted Windows/Linux development and security lab environments, configured software and networking components, and used command-line tools to diagnose connectivity, logging, application, and endpoint issues.

CERTIFICATIONS & TRAINING

Certifications: CompTIA Security+ | Microsoft Azure Fundamentals | Microsoft Security, Compliance, and Identity Fundamentals

Current Training: NPower Canada Network Security Professional | Fortinet NSE 4 hands-on labs

EDUCATION

Diploma, Computer Programming | Seneca Polytechnic | Toronto, ON | 04/2025

B.Sc., Microbiology | Federal University Ndufu-Alike Ikwo (FUNAI) | Nigeria | 2017
